

Cooperation between India and Oman in the field of Agricultural Research and Education

An Agreement on the project on the preparation of World Mango Encyclopedia has been signed between the ICAR and the Oman Government. The Deputy Director General (Horticulture), ICAR has been designated as the nodal point with regard to this project which envisages to prepare a universal scientific encyclopedia on the mango tree. The preparation of the encyclopedia requires, among other things, obtaining statistics, information, details and photographs of mango and related cultivars grown in India along with details on various other aspects like geographical distribution of mangos in India, their cultural practices, information on pests and diseases, cultural and historical importance of mango etc.
